

## Shelf life of HASLE Low Cement Castables (LCC)

HASLE Refractories A/S LCC castables and GUN products will retain their properties after production as follows:

HASLE LCC: **12months** after production

HASLE GUN: **9months** after production

The strength of the products will not be affected by storage after the above stated times, but setting time can increase. It is therefore recommended to assess workability and setting time of stored products before full scale installation if above mentioned times have been exceeded.

Above mentioned Shelf Life is dependent on correct storage according to instructions provided on the bags:

**DRY, UNDER ROOF, PROTECTED AGAINST RAIN, DIRECT SUNLIGHT, MOISTURE AND WIND**
