

Shelf life of HASLE Non-Cement castables (NC)

HASLE NC castables will retain their properties for **6months** after production.

The strength of the products will not be affected by storage but setting time will increase over time. It is therefore recommended to assess workability and setting time of products stored longer than 6months before full scale installation.

Above mentioned Shelf Life is dependent on correct storage according to instructions provided on the bags:

DRY, UNDER ROOF, PROTECTED AGAINST RAIN, DIRECT SUNLIGHT, MOISTURE AND WIND
