

## PRODUCT DESCRIPTION

### D1500SC

HASLE D1500SC is a strong and extremely alkali resistant low cement castable based on high-burnt fire clay (Chamotte) with an addition of SiC for improved shock resistance.

### Applications

In the cement industry D1500SC can be used in cyclones and calciner of preheater towers, in smoke chambers, riser ducts and grate cooler (bottom end).

D1500SC is also a good choice for linings in boilers and incinerators fired with various biomass-fuels and RDF.
